Pluit, North Jakarta, DKI Jakarta

I am a 23-year-old Information Technology student with expertise in backend development using Node.js, Java Spring Boot, and C#. In database management, I am familiar with MySQL and MongoDB, and have a basic understanding of PostgreSQL. In addition, I also have skills in UI/UX using Figma. As a graduate of bootcamps from Udemy and Coding Studio, I have gained practical experience in building backend applications and designing effective and intuitive interfaces.

For the past four years, I have been self-taught in technology, both through online courses and independent exploration. I continue to hone my skills in backend programming, database management, and UI/UX by taking various trainings and practicing directly in personal projects. With this approach, I am able to develop a deeper understanding of the technologies I master.

Skills

Frontend: HTML, CSS,BootStrap
Backend: Node.js, Express.js,Java Springboot,.NET (C#)
Database: MySQL, MongoDB,PostgreSQL
Tools:Linux, Git,Github, VS Code, Postman,NetBeans
